**PROJECT COSTS**

Project Costs	Total
Total Budget by year	\$567,000

---

**SUMMARY**

Justification of Need: Anticipating new MPCA guidelines, we must discharge backwash water into the sanitary sewer system. The current infrastructure capacity cannot handle increased flow from backwash process. We will need to store and release at a controlled flow rate.

Description: Install in-ground backwash reclamation tank at well houses. Well 3, 4, 5, 6, 8

**PROJECT COSTS**

Project Costs	2018	Total
Total Budget by year	\$400,000	\$967,000

---

**SUMMARY**

Justification of Need: The property dedication is intended to provide an area to allow set back of the water tower from development (to ensure a location for the future construction and maintenance). This elevated storage reservoir is needed to provide fire protection for anticipated development of commercial/industrial and residential properties located in the NW quadrant of the City. Elevated storage reservoirs also provide a needed water source during peak hour water demands. The Water System Master Plan has this reservoir scheduled for construction in 2018 to 2020 as the actual need demonstrates.

Description: Construct a 2,000,000 gallon elevated or ground storage reservoir and associated watermain segment located at approximately Winnetka Ave and 101st Ave. N. The City has negotiated with Target Corporation, and the proposed agreement includes the dedication of approximately 2 acres for the reservoir site. 2018: Design reservoir, obtain regulator approvals (\$400,000) 2018 & 2019: Let Contract, Construct Reservoir (\$3,100,000) DEPARTMENT: Operations & Maintenance/Public Utilities Division KEY DECISION ISSUES: Dependent on pace of development. Funding is incorporated in water rates.
